How to connect to VPN using a Mac

Go to the apple logo and click on **System Preferences**

Go to **Network**
Click on the the “+” sign at the bottom left

Select VPN for Interface PPTP for VPN type and name the service CMSV VPN

Click Create
In server address type `vpn.mountsaintvincent.edu`

In account name type your **Dolphinet Username** (without @mountsaintvincent.edu)

Click on **Authentication Settings** and type in your Dolphinet Password and click **OK**
Check on the **Show VPN Status in menu** box and click **connect**
Your status should now show **Connected**
